## **CLAIMS 1-22 ARE PRESENTED FOR EXAMINATION**

### **DETAILED ACTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims part of claims 1, 6 and claims 5 and 12, drawn to a method of reducing serum cholesterol.
- II. Claims part of claims 1 and 6 and claims 4 and 13 drawn to a method of reducing atherosclerosis.
- III. Claims part of claim 1 and 6 and claims 3, 7 and 9 drawn to the treatment of obesity, appetite and weight gain.
- IV. Claims part of claim 1 and 6 and claims 2, 10 and 11 drawn to a method of treating diabetes.
- V. Claim 8 drawn to a method of inhibiting growth factor production.

Inventions of Groups I to V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the treatment of growth factor production, weight gain, diabetes and atherosclerosis have different modes of operation and different effects. The treatment of the various diseases as grouped have acquired a separate status in the pharmaceutical art since they each have a different etiology.

Applicant is advised that a reply to this requirement must include an identification of the group that is elected consonant with this requirement, and a listing of all claims

readable thereon. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

No telephone communication was made on this restriction requirement because the restriction is complex. (MPEP 812.01).
